

INTEGRATED EVACUATION GUIDE

PROJECT OVERVIEW

Develop an Integrated Evacuation Guide (IEG) detailing the distinct roles that Operations, Engineering Services, and local fire officials perform when executing high-risk evacuations.

The development of the IEG will specifically focus on high risk evacuation scenarios at select attractions domestically and the roles, responsibilities, and required equipment needed.

Upon completion of this project participating areas will be provided comprehensive documents detailing how the identified teams work together to facilitate the process of high-risk evacuations.

KEY PROJECT MILESTONES

SLINKY DOG DASH

IEG has been published and delivered to the teams.

INCREDICOASTER

IEG has been published and delivered to the teams.

PROJECT TIMING ▶ **1-2** new builds and legacy attractions per quarter per property.
